

Commonwealth of Kentucky
Division for Air Quality
EXECUTIVE SUMMARY

FINAL
Conditional Major / Operating
Permit: F-06-053
Louisville Bedding Company
Munfordville, Kentucky
NOVEMBER 29, 2006
ELAHE HOUSHMAND
PLANT I.D. #21-099-00008
A.I. NUMBER: 38414
ACTIVITY NUMBER: APE20030001

SOURCE DESCRIPTION:

Louisville Bedding has submitted an application for a permit renewal of operation of a manufacturing plant. There has been no change in process and materials from the current permit, F-98-03. The only change is removal of the gluing stations that is listed on the current permit as an insignificant activity.

Louisville Bedding's potential VOC emission is over the 100 tons/yr threshold. However, the facility has requested that enforceable limit be placed on their actual VOC emissions so that this facility will be classified as a conditional major source for VOC.

On October 19, 2006, the public notice on availability of the draft permit and supporting material for comments by persons affected by the plant was published in NEWS- HERALD in Munfordville, Kentucky. The public comment period expired 30 days from the date of publication. No comments were received during this period.

In conclusion, a thorough analysis has been made of all relevant information available that pertains to this application. The Division has concluded that the source will comply with all applicable air quality regulations and requirements. Compliance with the terms of the permit will ensure compliance with all air quality requirements. Therefore, it is the Division's final determination that a Conditional Major Permit 401KAR 52:030 should be issued as conditioned.
